

## Rana Raees

Senior MERN Stack Next.js Developer 5+ Year Experience

raees@maxbitz.com | (+92) 3434616650

### EXPERIENCE

- ❖ **Senior MERN Stack Developer | MAXBITZ PVT Limited Faisalabad** (Jan 02 2023)  
I created a Kahoot like multiplayer game with live chat, points, and questions using Socket.IO and the MERN stack. I managed role-based data, played the game, and other project I am working on is integrating the Gmail API for Gmail clone to add additions.
- ❖ **Senior MERN Stack Developer | MTech Soft Lahore** (May 01 2023)  
I shifted here to explore real-time application development with Socket.IO. I learned to build trading platforms, multiplayer games, and websites, implementing live chats, data updates, and real-time interactions using web sockets.
- ❖ **Senior MERN Stack Developer | Car Rent Company Spain (Remote Full Time)** (Mar 02 2021)  
I built an application where users can rent cars online, checking availability based on time and car availability. Users can also set the duration for renting the car, providing a calendar-based experience. It was a great learning experience for me.
- ❖ **MERN Stack Developer | Findonic Recruiter India (Contract 3-month)** (Dec 05 2020)  
I learned how applications like LinkedIn are created using DSA. I also explored digital recruiter procedures and authentication as both a recruiter and job seeker, gaining insights into building large-scale applications.
- ❖ **Next.js Developer | bet365 Company British (Contract 6-month)** (May 14 2020)  
I explored Next.js, TypeScript, and NextAuth, while also diving into bidding concepts, backend implementation using MongoDB, and building highly scalable applications, all while mastering complex mapping with TypeScript.
- ❖ **Junior MERN Stack Developer | Ranksol FSD Pakistan (On-site)** (Jan 01 2019)  
I developed my first e-commerce application, mastering payment gateway integration, filtration, searching, pagination, order tracking, and digital checkout flows. Additionally, I created a property renting and buying system, exploring digital property transactions and NFTs
- ❖ **MERN Internship | Best Seo Zone Software House (On-site)** (Oct 02 2018)  
I mastered MERN stack concepts, built a data-fetching application, and honed my skills during a 3-month internship, enhancing my professional growth.

### EDUCATION

- ❖ BS CS | GC University| FSD Pakistan CGPA: 3.4 | 2020
- ❖ XII (BISE) | BISE FSD 92.0%| 2016

### ACADEMIC PROJECTS

❖ **Socket Exploration: Creating a WhatsApp Clone**

I developed a WhatsApp clone to delve into socket programming, specifically utilizing Socket.IO. Through this project, I gained expertise in web sockets, audio streaming, video streaming, and various real-time data functionalities closely related to WhatsApp.

❖ **OpenAI API PDFs Subscription Based Web App Chatbots**

I created a subscription-based web app integrating OpenAI API, with PayPal and Stripe payment gateways. Implemented authentication, authorization, and RESTful API using TypeScript within Next.js and tailwind CSS and work with a lot of AI chatbots.

❖ **LMS, CMS, CRM**

I've developed and managed Learning Management Systems (LMS) to streamline education delivery, Content Management Systems (CMS) for efficient website content management, and Customer Relationship Management (CRM) solutions to optimize sales and enhance customer interactions.

## SKILLS

- ❖ HTML5, CSS3, JavaScript, jQuery, Typescript,
- ❖ React.js, Node.js, Express.js, Next.js, Next-auth
- ❖ MERN stack
- ❖ Bootstrap 5 , Tailwind CSS. Material UI, Redix UI, MDB Bootstrap , Chakra UI, React-Bootstrap, Semantic UI React, Ant Design, etc.
- ❖ MySQL, MongoDB

## Goal

My goal is to take my expertise to the next level, and I believe that by working with talented minds, I'll immerse myself in their community and gradually become like them. My goal is to achieve senior and top-level expertise in the fields of MERN stack and Next.js, and I seek your assistance in this endeavor
